COMPANY PROFILE

About the company

APEX CORE INFRA is a founder-led construction and infrastructure company operating across Jammu & Kashmir. We deliver turnkey civil works, road and highway packages, tunnel and railway structures, sports and industrial facilities, project management and construction consultancy. Our practice combines modern engineering discipline with rigorous site execution, so that every handover performs for decades.

Mission

To build infrastructure that is safe, durable and delivered on programme — through engineered planning, traceable materials and transparent client reporting.

Vision

To be recognised among the most dependable infrastructure delivery partners in the Himalayan region, trusted by government departments, EPC contractors and private developers alike.

Core values

- **Integrity** — clear commitments, honest measurement, no shortcuts.
- **Engineering precision** — codified standards and stage-wise inspection on every activity.
- **Safety first** — a zero-harm target on every work front.
- **Accountability** — documented progress, costs and quality records shared with clients.

WHAT WE DELIVER

Services

Discipline	Scope
Civil Construction	Foundations, RCC frameworks, masonry, waterproofing and finishing works executed to IS codes.
Road Construction	Urban, approach and internal roads including sub-base, WMM, bituminous layers and drainage.
Highway Infrastructure	Highway packages, flyovers, bridges, culverts and allied structures on national corridors.
Tunnel & Underground Works	Tunnel support works, PCC/RCC lining support, portal works and slope stabilisation.
Railway Structures	Reinforced concrete piers, abutments and bridge substructure works for railway alignments.
Industrial Construction	Factories, warehouses and pre-engineered building structures with heavy-duty flooring.
Commercial Construction	Offices, retail and mixed-use developments delivered on programme.
Residential Construction	Independent homes and apartment communities with quality finishing.
Sports Infrastructure	Stadiums, athletic tracks, courts and allied sports facilities.
Project Management	PMC services for owners — planning, cost control, quality audit and reporting.
Renovation & Maintenance	Structural repairs, retrofitting and annual maintenance contracts.
Construction Consultancy	Feasibility studies, tender support, estimation and technical advisory.

TRACK RECORD

Selected projects

Project	Contribution
Tunnel T-77D, Jammu & Kashmir	Tunnel construction works leading to the successful breakthrough milestone in March 2022, with Beigh Construction Company (BCC).
Chenani–Nashri Tunnel Project	Plain Cement Concrete (PCC) works as part of the tunnel infrastructure programme, with Beigh Construction Company.
Banihal Bypass Flyover	Flyover construction works with M/S Rashid Ahmed Beigh (RAB) for the MG Construction Company project.
Railway Bridge BR-138	Reinforced concrete pier construction works with M/S Rashid Ahmed Beigh (RAB).
Amaravati–Chikli Road Project	50 km drainage system executed as part of a major road infrastructure development.
BHEP Chandarkot Project	Retaining wall construction supporting slope stabilisation and long-term structural safety.

Quality & safety

- Stage-wise inspection and sign-off against approved drawings.
- Cube, slump and aggregate testing with third-party verification where specified.
- Method statements and job hazard analysis for tunnelling, height work and deep excavation.
- Mandatory PPE, toolbox talks, barricading and controlled site access.
- Dust, noise and spoil management with site restoration on completion.
